

Wakim Solutions Group

Microsoft 365 / Entra ID Admin Lab

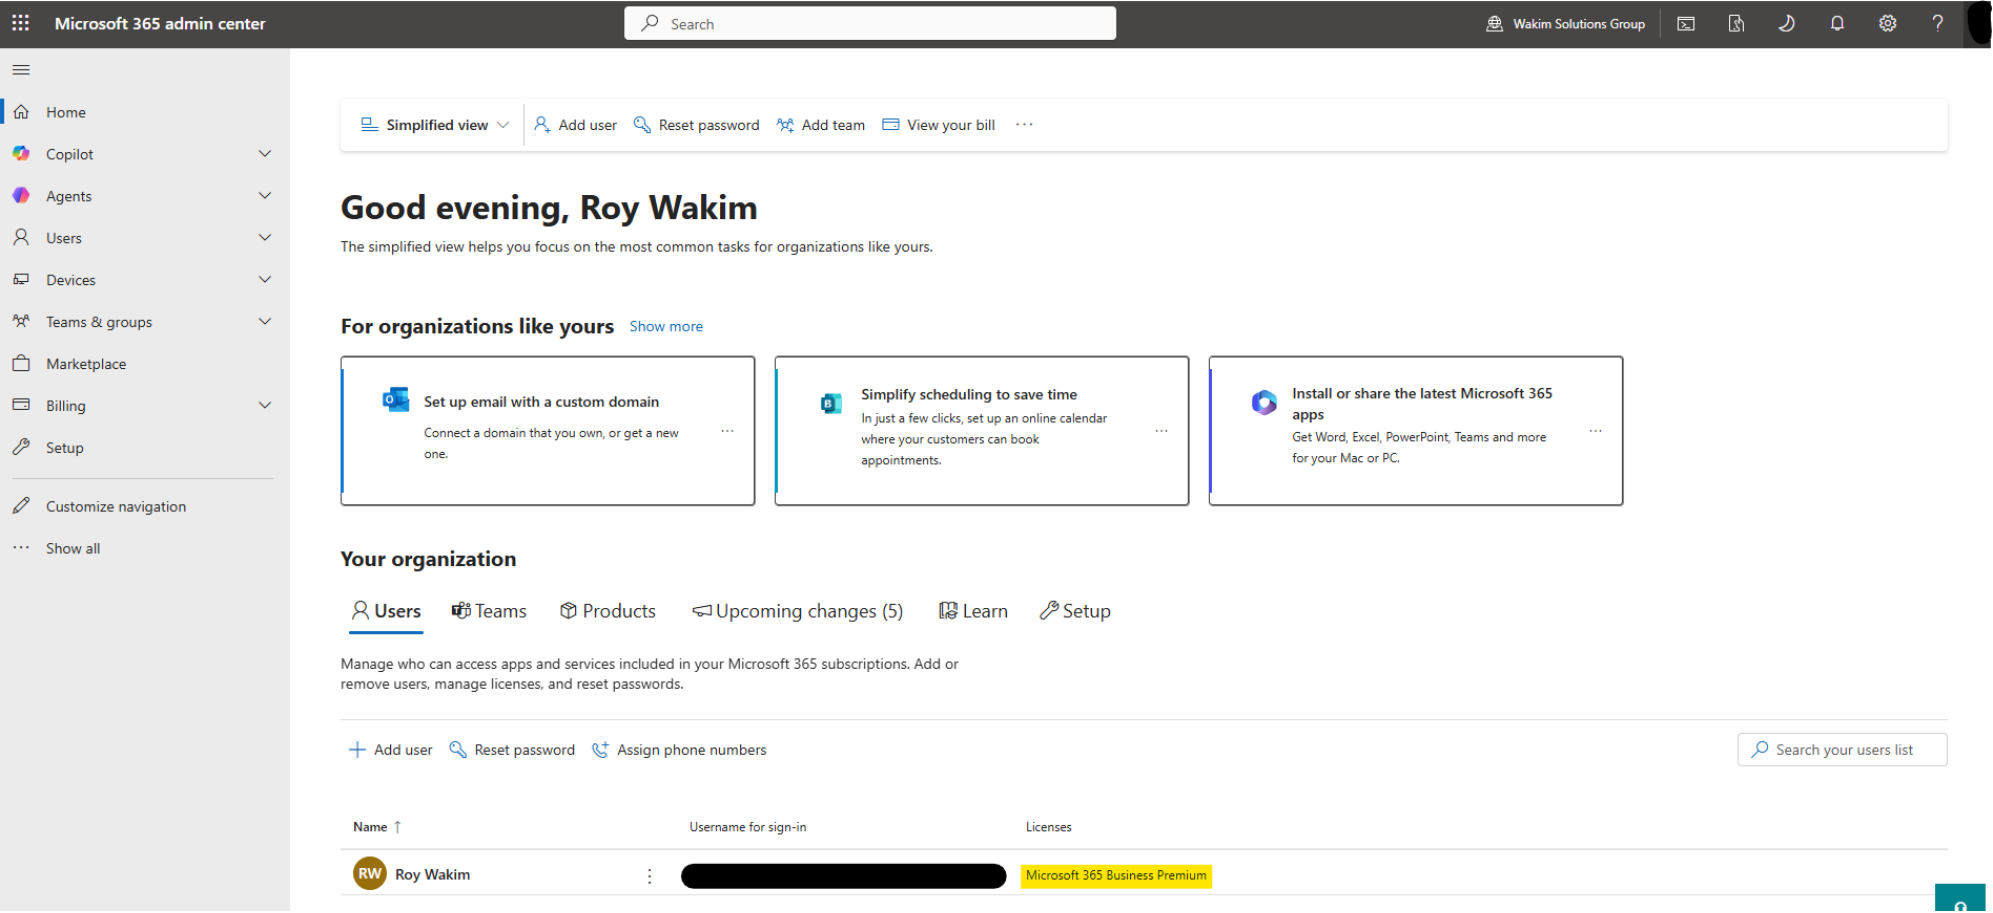

A cloud administration lab simulating Microsoft 365 user management, licensing, password resets, shared mailbox access, Teams membership, offboarding, and helpdesk documentation.

Created by: Roy Wakim

Tools: Microsoft 365 Business Premium • Microsoft 365 Admin Center • Microsoft Entra Admin Center • Teams Admin Center • osTicket

Created a Microsoft 365 Business Premium trial tenant for Wakim Solutions Group to simulate cloud-based IT administration, user management, license assignment, password resets, and support workflows.

Assigned a Microsoft 365 Business Premium license to a new cloud user to enable access to Microsoft 365 services such as Outlook, Teams, OneDrive, and security features.

Add a user

You've successfully reset the password for this user.

User	Password
[REDACTED]	***** Show

Recommended actions (1)

Blocked sign-in for a former employee account to simulate Microsoft 365 offboarding and access removal.

Block sign-in

✓ Jason Miller is now blocked from signing in. They'll automatically be signed out of all Microsoft services within 60 minutes.

Blocking someone prevents anyone from signing in as this user, and is a good idea when you think their password or username may have been compromised. When you block someone, it immediately stops any new sign-ins for that account, and if they're signed in, they'll be automatically signed out from all Microsoft services within 60 minutes.

This won't stop the account from receiving mail, and doesn't delete any data.

☒ Block this user from signing in

[Forgot my password](#)

Sign in

Restored sign-in
access to a Microsoft
365 user account to
demonstrate account
recovery and sign-in
status management.

Unblock sign-in

✓ Jason Miller is now unblocked from signing in. It may take up to 15 minutes for them to be able to sign in again

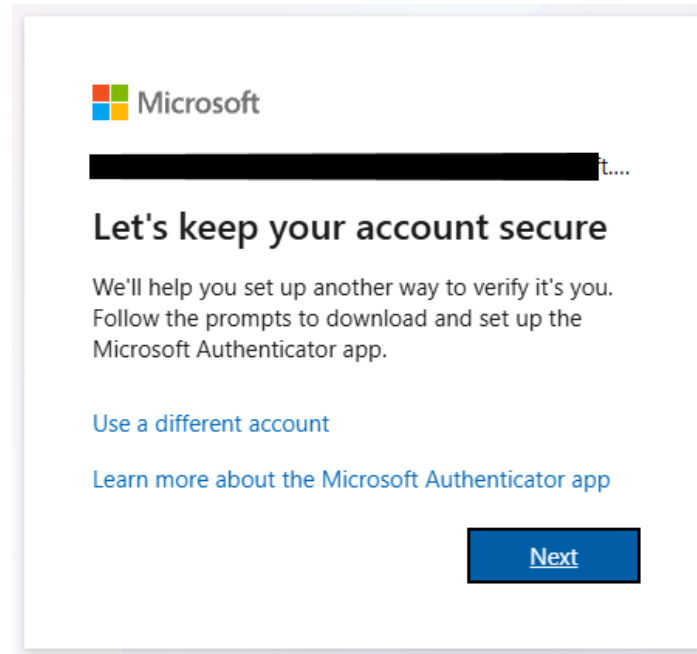

Blocking someone prevents anyone from signing in as this user, and is a good idea when you think their password or username may have been compromised. When you block someone, it immediately stops any new sign-ins for that account, and if they're signed in, they'll be automatically signed out from all Microsoft services within 60 minutes.

This won't stop the account from receiving mail, and doesn't delete any data.

☐ Block this user from signing in

i It may take up to 15 minutes until this user can sign-in again

Reviewed Microsoft
Entra Security
Defaults and verified
that baseline MFA
protection was
enabled for the
tenant.

Security defaults

Security defaults

Enabled

Your organization is currently using security defaults.

99.9% of account compromise could be stopped by using multifactor authentication, which is a feature that security defaults provides.

Microsoft's security teams see a drop of 80% in compromise rate when security defaults are enabled.

Created a Helpdesk
shared mailbox to
simulate a
centralized IT
support mailbox for
user requests.

How to Reset a Microsoft 365 User Password

Last Updated just now

Purpose:

This article documents the standard helpdesk process for resetting a Microsoft 365 user password.

Steps:

1. Confirm the user's identity and ticket details.
2. Open Microsoft 365 admin center.
3. Go to Users > Active users.
4. Select the affected user.
5. Choose Reset password.
6. Generate or set a temporary password.
7. Enable "Require this user to change their password when they first sign in."
8. Provide the temporary password through a secure approved method.
9. Add an internal note in osTicket documenting the completed action.
10. Reply to the user and close the ticket.

Validation:

The user should be able to sign in with the temporary password and create a new password when prompted.

Tools:

Microsoft 365 admin center, osTicket.

Documented the Microsoft 365 shared mailbox access workflow, including assigning mailbox permissions, recording the change in osTicket, and notifying the user.

How to Grant Access to a Microsoft 365 Shared Mailbox

Last Updated 17 seconds ago

Purpose:

This article documents the process for granting a user access to a shared mailbox.

Steps:

1. Confirm the shared mailbox name and requested user access from the ticket.
2. Open Microsoft 365 admin center.
3. Go to Teams & groups > Shared mailboxes.
4. Select the shared mailbox.
5. Open mailbox permissions.
6. Add the user to Read and manage permissions.
7. Add Send as permissions only if requested or approved.
8. Inform the user that mailbox permission changes may take time to appear.
9. Document the change in osTicket.
10. Close the ticket after confirming completion.

Validation:

The user should be able to access the shared mailbox in Outlook after permissions apply.

Tools:

Microsoft 365 admin center, Exchange mailbox permissions, osTicket.

Documented the Microsoft Teams access workflow, including adding a user to the correct department Team, verifying membership, and updating the ticket.

How to Block Microsoft 365 Sign-In for an Offboarded User

Last Updated 16 seconds ago

Purpose:

This article documents the cloud offboarding process for blocking Microsoft 365 access.

Steps:

1. Confirm the offboarding request and affected user.
2. Open Microsoft 365 admin center.
3. Go to Users > Active users.
4. Select the affected user.
5. Open sign-in status.
6. Select "Block this user from signing in."
7. Review assigned licenses and group memberships.
8. Remove access where required by policy.
9. Document the action in osTicket.
10. Reply to the requester and close the ticket.

Validation:

The user should no longer be able to sign in to Microsoft 365 services.

Tools:

Microsoft 365 admin center, Entra ID, osTicket.

Documented the Microsoft 365 onboarding workflow, including creating the user, assigning a license, adding group/Team access, and updating the ticket.

How to Onboard a New Microsoft 365 User

Last Updated 16 seconds ago

Purpose:

This article documents the standard Microsoft 365 onboarding workflow for a new employee.

Steps:

1. Review the onboarding ticket and confirm the user's name, department, job title, and required access.
2. Open Microsoft 365 admin center.
3. Go to Users > Active users.
4. Create the new user account.
5. Assign the correct Microsoft 365 license.
6. Require password change at first sign-in.
7. Add the user to the correct Microsoft 365 group.
8. Verify department Team membership if applicable.
9. Document the completed setup in osTicket.
10. Reply to the requester and close the ticket.

Validation:

The user should have an active Microsoft 365 account, assigned license, and correct group/Team access.

Tools:

Microsoft 365 admin center, Microsoft 365 groups, Teams admin center, osTicket.
